

INDEX TO VOLUME 13

A

- Abbott, Maude E., 254
- Abnormality, congenital, of heart, due to defective development of right ventricle associated with tricuspid atresia or hypoplasia, 754*
- Abramson, D. I., Katz, L. N., Margolin, S., and Lourie, R., 217
- Acceleration, importance of position on ability to withstand, 498*
- Aceto-acetic acid, feeding of, production of intimal changes in arteries attempted in rat by, 246*
- Acetylcholine, action of, on blood vessels, blood pressure, heart and vasomotor centers, 748*
- injected intraarterially, in sympathectomized subjects, 631*
- intensification by eserine of, upon secretion of adrenalin, 628*
- coronary arteries, reaction of, to, 500*
- Acid, production of, in functioning heart under conditions of ischemia and of congestion, 743*
- Actinocardiography, 761*
- Adamek, G., and Friedländer, E., 758*
- Addison's disease, thromboangiitis obliterans and, in same patient, 507*
- Age, physiology of, 502*
- relation of, to structure of small arteries and arterioles in skeletal muscle, 246*
- significance of relative duration of systole in healthy persons, 379*
- Air chambers, cooling: depth temperature in artificial fevers and, with special reference to cooling effect of circulating blood, 746*
- Allen, Edgar V., and Lauderdale, T. L., 384*
- , and McKechnie, R. E., 383*
- , and Norman, I. L., 257
- Allergy, idiosyncratic eosinophilic myocarditis, 242*
- Allorhythmia, extrasystolic, 749*
- Altschule, Mark D., and Blumgart, H. L., 589
- Analeptics, circulatory action of, 760*
- Andrus, Frank C., 246*
- Anemia, anoxemia and, of heart muscle and angina pectoris, 744*
- condition of, acid production in functioning heart under, 743*
- hookworm, heart changes and physiological adjustment in, 550
- Aneurysm, aortic, mediastinal movement in, 761*
- arteriovenous, with pronounced electrocardiographic changes, 95
- dissecting, of aorta, 129, 426
- of subclavian artery, cervical rib associated with, 507*
- popliteal, ruptured, demonstration by thorium dioxide arteriography, 127*
- thoracic, symptoms of, persistent hiccoughs as, 624
- Angina pectoris, anemia and anoxemia of heart muscle and, 744*
- Anoxemia, anemia and, of heart muscle and angina pectoris, 744*
- Anxiety, symptom of, and cardiac psychosis, 394
- Aorta, abdominal, stenosis, congenital, of, 633
- abnormality of, and heart, use of barium-filled esophagus in x-ray of, 723
- aneurysm, dissecting, of, 129, 426
- mediastinal movement in, 761*
- arch of, right sided, 754*
- studies, chemical and histological, upon, of horse, 502*
- thrombosis of, and coronary arteries with "fibrinoid" lesions, 126*
- Aortitis, syphilitic, early, diagnosis of, teleroentgenography in, 297
- Arenberg, H., 197
- Arrhythmia, asystole, ventricular, effect of, on respiration, 239*
- atrioventricular, with and without retrograde block, 61
- physiological, of heart beat, 123*
- Arteries, digital, of normal and hypertensive individuals, 1
- of extremities, sudden occlusion of, 383*
- Arteriography, thorium dioxide, demonstration of ruptured popliteal aneurysm, 127*
- thorotrast study of acquired arteriovenous fistula, 247*
- thromboangiitis obliterans in negroes, 511
- Arterioles (*see* Artery)
- Arteriosclerosis, experimental, inhibition of, by potassium iodide and colloidal silicic acid, 627*
- investigations on, 124*
- human, in relation to cholesterol content of blood serum, 125*
- intima of coronary arteries in, vascularization and hemorrhage of, 127*
- pulmonary, primary, 756*
- rheumatic, pathogenesis of, 756*
- Artery, "balloon" of, elasticity of, at different ages in man, 128*
- carotid, exteriorization of, dietary and emotional factors affecting blood pressure of cats, observed by, 238*
- changes in intima of, in rat by prolonged feeding of aceto-acetic acid, 246*
- coronary, arteriosclerotic, intima of, vascularization and hemorrhage of, 127*
- disease of, 254 (book review)
- left, circumflex branch of, blood flow in, of intact dog, 119*
- occlusion, acute impending, diagnosis of, 675
- experimental, hemodynamics of, 647, 664
- radial artery changes in comparison with those of, and other arteries, 757*
- reaction of, to acetylcholine, 500*
- sclerosis of, relation of, to symptoms, 753*
- thrombosis of, acute, and myocardial infarction affecting a patient thirty-one years of age, 741
- and aorta with "fibrinoid" lesions, 126*
- heart failure and other factors in its course and prognosis, 330
- size of heart after, 630*
- denervated, vasomotor tonus of, 380*
- digital, of normal and hypertensive individuals, 1

Artery—Cont'd

- disease, occlusive, of, treatment of, of extremity by passive vascular exercise, 761*
- of lower extremity, relief of pain by peripheral nerve block in, 246*
- human, velocity of blood stream, 249*
- mesenteric, superior, embolization of, genesis of intestinal infarction following, 382*
- occlusion, complete, of, with involvement of entire small intestine, 126*
- mesentery, occlusion of, of arterial and venous origin, 757*
- occlusion, acute, of extremities, 126*
- of extremities, sudden occlusion of, 383*
- peripheral, disease, obstructive, of, treatment of, by intermittent venous occlusion, 247*
- importance of, in industrial practice, 507*
- pulmonary, bloodless method of measuring pressure in, 504*
- calcification, marked, of, 756*
- constriction of, by adhesive pericarditis, 470
- puncture of, measuring arterial pressure directly by, 377*
- radial changes of, in comparison with those of coronary artery and other arteries, 757*
- small, structure of, relation of age and hypertension to, in skeletal muscle, 246*
- spasm of, in acute venous thrombosis, 247*
- subclavian, aneurysm of, cervical rib associated with, 507*
- thrombosis, extensive, of, and venous, complicating chronic ulcerative colitis, 125*
- unopened, measurement of velocity of blood flow in, 128*
- wall, living, elasticity of, action of musculature on, 756*
- Arthritis, endocarditis, thrombotic non-bacterial, associated with, 243*
- Ashmun, Richard, 763
- Asphyxia, reduction in circulation through hand resulting from, 251*
- Athletics, power and hypertrophy of heart following, 630*
- Atherosclerosis (*see* Arteriosclerosis)
- Autohemagglutination, reversible, with peripheral vascular symptoms, 386*

B

- Babey, Andrew, 228
- Bacal, H. L., and Struthers, R. R., 124*
- Baker, Lyle A., McNamara, W. L., and Ducey, E. F., 108
- Baldes, Edward J., Essex, H. E., Herrick, J. F., and Mann, F. C., 119*
- Balloon, central position of, in circulation, 248*
- Balmis, J., Vires, J., and May, P., 386*
- Bansi, 497*
- Bargen, J. Arnold, and Barker, N. W., 125*

- Baumann, E., 753*
- Bay, Emmett B., 241*
- Bedford, D. Evan, and Parkinson, J., 754*
- Bellet, Samuel, and Dyer, W. W., 72
- Benzedrine, orthostatic hypotension, treated with, 114
- Berger, A. A., 440
- Berger, Adolph R., and Clark, E., 124*
- Beriberi, pernicious, acute form of, and treatment by intravenous administration of vitamin B₁, 580
- Betts, W., Roesler, H., and Gifford, U. G., 426
- Bischoff, 751*
- Bishop, G. H., and Gilson, A. S., 629*
- Block, C., 749*
- , and Pick, A., 749*
- Blood, arterial, oxygen and carbon dioxide content of, and venous, of normal subjects, 504*
- saturation of, in man, 498*
- circulating, cooling effect of, depth temperature in artificial fevers and cooling air chambers with special reference to, 746*
- flow of, in circumflex branch of left coronary artery of intact dog, 119*
- of kidneys studied with Rein stromuhr, 498*
- peripheral, in surgical shock, 251*
- regulation of, circulatory and chemical, during and after exercise, 496*
- velocity of, and related aspects of circulation in normal pregnant women, 251*
- in human arteries, 249*
- in unopened arteries, 128*
- volume of, in clinical cases of surgical shock, 251*
- plasma and total blood volume, relation to venous pressure, blood velocity, physical measurements, age, and sex in 90 normal humans, 748*
- pressure, acetylcholine, action of, on, 748*
- action of deep breathing on, 380*
- arterial, dome of, influence of musculature of blood vessels in, 376*
- measuring directly by arterial puncture, 377*
- bloodless method of, in pulmonary artery, 504*
- bloodless method of measuring, in pulmonary artery, 504*
- dietary and emotional factors affecting, observed by exteriorization of carotid artery, 238*
- recording with electrical transmission, 379*
- rise of, following strong electrical current, 499*
- systemic, influence of splanchnic region on, 505*
- variations of, in diseases of hypophysis, 245*
- venous, estimation, direct, value of, in ambulatory cardiac patients, 440
- measurements, comparative value of, in femoral and cubital veins, 431
- protein, changes, specific and nonspecific, in, during acute rheumatism with carditis, 754*
- venous, human, increase in concentration of histamine-like substance in, during period of reactive hyperemia, 760*
- oxygen and carbon dioxide content of, and arterial, of normal subjects, 504*
- vessels, acetylcholine, action of, on, 748*
- cerebral, action of histamine upon, 631*
- innervation in man, 247*
- complication in cervical rib, 508*
- of polycythemia, 257
- dilatation and constriction of, in response to warming and cooling body, 508*

- Blood vessels—Cont'd
 extremities, embolectomy of, 252*
 incidence and significance of, in normal and abnormal heart valves, 7
 large, shadow of, relation of, to depth of chest, 761*
 musculature, influence of, on arterial pressure dome, 376*
 reactions of skin to active principles of body, 499*
 relation of living mammalian lymphatic capillaries to, 376*
 renal reaction of, during course of regulatory events in systemic circulation, 385*
 significance of, in human heart valves, 275
 skeletal muscle, nerve plexus of, vasomotor interference in, induced by vasodilator substance following hyperemia, 748*
 sympathectomized, control of, by sympathomimetic hormones and relation to surgical treatment of patients with Raynaud's disease, 380*
 volume, clinical application of method employing blue azo dye, "Evans blue," and the spectrophotometer, 747*
 studies, relation of plasma and total blood volume to venous pressure, blood velocity rate, physical measurements, age and sex in 90 normal humans, 748*
 total, relation of plasma and, to venous pressure, blood velocity rate, physical measurements, age, and sex in 90 normal humans, 748*
